Public Hearing on the Adoption of a Desired Future Condition for all Aquifers within Groundwater Management Area 13:

Mr. Mahoney started off by asking GMA 13 committee members Naumann, Sengelmann, and Meyer what scenario would accommodate their needs. The three mentioned members agreed that Scenario 4 with a 23' drawdown was their preference.

James Bené questions Mr. Hutchinson with the TWDB on how the numbers were put together for Scenario 4 with 23' drawdown. Mr. Hutchinson responded by stating that the numbers came from grid cells with multiple layers which included counties, districts and other tables within the cells.

Larry Dunbar expressed his concerns with the drawdown amount and cautioned the GMA 13 in approving significant draw downs in which the GMA 13 may regret at a later date.

Chad Norris with the Texas Parks and Wildlife expressed his concerns with the impacts on surface water.

The GMA 13 committee members stated that if the drawdown of 23' is not working for the GMA 13, it can be amended at any time. Mr. Mahoney stated that in the future the GMA 13 committee would still rely on the public to continue and help with the process of the DFC's.
