RECORDS OF WATER-LEVEL MEASUREMENTS IN OBSERVATION WELLS IN HARRIS COUNTY, TEXAS

INTRODUCTION

The collection of hydrologic data in and around Houston, Harris County, Texas, was begun by the U.S. Geological Survey on a more or less continuing basis about 1929. The current program is carried out in cooperation with the Texas Water Development Board and the city of Houston.

Water-level measurements in most observation wells in Harris County are made annually, but some measurements are made monthly, quarterly, or semiannually. A continuous record is obtained at a few locations where water-stage recorders are installed. If numerous measurements in a well were made during a short period of time or if water-level data were obtained from a water-stage recorder, representative water levels were selected for publication.

Water levels are referenced to land surface datum. Most of the measurements are reported in feet below land surface. For those wells with water levels above land surface (flowing wells), the measurement in feet above the datum is preceded by a plus sign.

Data on the geology, hydrology, pumpage, and chemical quality of ground water may be obtained from

previous publications (Gabrysch, 1967; Lang, Winslow, and White, 1950; White, Rose, and Guyton, 1944; Wood and Gabrysch, 1965). Because previously published water-level measurements are reproduced in this report, it is unnecessary to cross-reference the well numbers.

WELL-NUMBERING SYSTEM

The well-numbering system used in this report has been adopted by the Texas Water Development Board for use throughout the State. Under this system, each 1-degree quadrangle in the State is given a number consisting of two digits. Harris County includes parts of quadrangles 60, 64, and 65. Each 1-degree quadrangle is divided into 7½-minute quadrangles which are given 2-digit numbers from 01 to 64. These are the third and fourth digits of the well number. Each 7½-minute quadrangle is subdivided into 2½-minute quadrangles and given a single digit number from 1 to 9. This is the fifth digit of the well number. Finally, each well within a 2½-minute quadrangle is given a 2-digit number in the order in which it is inventoried, starting with 01. These are the last two digits of the well number. In addition to the 7-digit well number, a 2-letter prefix is used to identify the county. The prefix for Harris County is LJ. The prefix is not included with the well numbers in Table 1 because all wells are in Harris County.

EXPLANATION

- ⁴⁰⁴ Current Observation Well (as of 8-11-66)
- ¹⁰⁴ Discontinued Observation Well
- Number corresponds to well number given in Table I

Figure 1
LOCATION OF OBSERVATION WELLS
